Simple & Sustainable - We Create Infinite Possibilities For You

EPOPACK is a manufacturer based in Taiwan with a contact office in Canada. With over 30-years experience in R&D and manufacturing we provide high quality, sustainable packaging solutions for the beauty industry. Specializing in PET heavy wall bottles, jars and airless bottles that are available in 100% PCR PET.

After years of operating in the beauty industry we know that customers need more than just a container, they need a storyteller. Good packaging tells stories and sells products. Create a unique visual identity, convey your brand message clearly, and embrace sustainability all at once with the flexibility we offer.

Our focus has remained PET material, employing a heavy wall design to provide global sustainable and high-quality packaging solutions. Our offerings are both chic and adaptable, allowing for easy customization.

Furthermore, we have been dedicated to developing 100% post consumer recycled (PCR) PET heavy-wall bottles since 2009 with ever changing developments and improvements that expand what's possible with sustainability!

Our corporate social responsibility focuses on preserving the Earth for future generations. We uphold the mission to use energy-efficient and highly sustainable materials while continuously making technological improvements and aesthetic refinements to develop a wealth of packaging options. Tell your story for years to come with Epopacks premium packaging and unparalleled customer support.

Heavy wall style

The premium heavy wall feature creates a feeling of richness which makes cosmetic products stand out. With PET's high clarity, it looks just like glass but it's shatterproof! EPOPACKS' heavy wall style goes beyond being a mere aesthetic choice. It embodies reliability, innovation, and showcases our profound commitment to sustainable and beautiful packaging options.

PET Material

PET, short for Polyethylene Terephthalate, carries international recycling code #1 making it the most widely recycled plastic material in the world. PET's high level of clarity makes it ideal for showcasing formulations from any angle. Its remarkable physical and chemical resistance, along with its superior rigidity make it a preferred choice for packaging solutions that require durability and protection. PET's high recyclability contributes to its ever growing popularity in sustainable packaging initiatives.

Up-Spring Style Pump

At EPOPACK we focus on the smallest details because we know they make all the difference. Our up spring style pumps are an improvement to the standard pump system. A small yet powerful feature we provide with all our pump systems is the metal spring being outside the tube which allows for a metal free pathway for the formulation and overall superior product protection by comparison. This is the perfect example of a key feature that you never see but the functionality relies on it working right and the details involved throughout are paramount to a positive user experience.

100%
PCR PET

100% Post Consumer Recycled PET

100% PCR PET bottles and jars present the products in a sustainable yet stylish brand image. A perfect storytelling packaging for an eco-friendly brand.

- *What is PCR?*

Post Consumer Recycled

Plastic that has completed its life cycle. Recycled plastic is collected, sorted, cleaned, and made into resin pellets.

- *100% PCR PET*

Achieved by breaking down PET material to the molecular level. This allows for much of the imperfections commonly seen in PCR to be removed. You see less colour variation, dark spots, flow lines, and you can achieve a clarity that was previously impossible in heavy-wall style. Give the best of both worlds with this exciting option, it's time to expand what's possible with sustainability and EPOPACK!

- *Why only 100%?*

Consistent Production

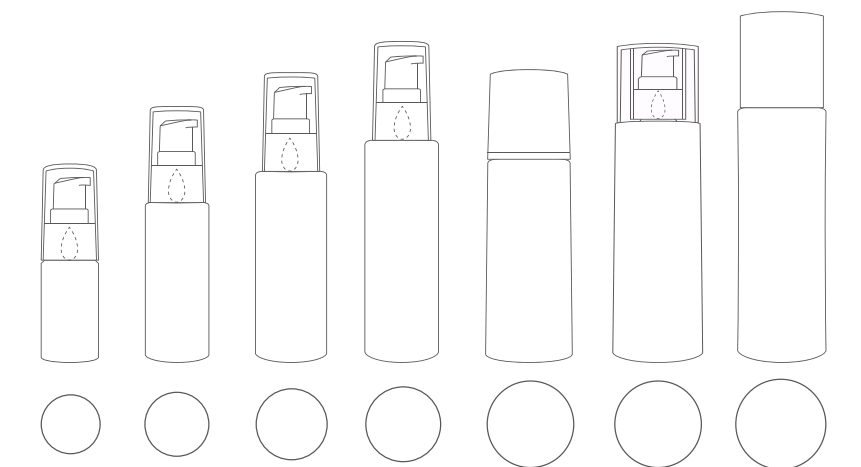

Throughout our many years of testing and handling this material, we have determined that mixing PCR PET with virgin PET to make a lower percentage will result in a higher defect rate. To combat this unnecessary waste, we only use 100%.

At EPOPACK, it's all or nothing.

PET HEAVY WALL BOTTLE

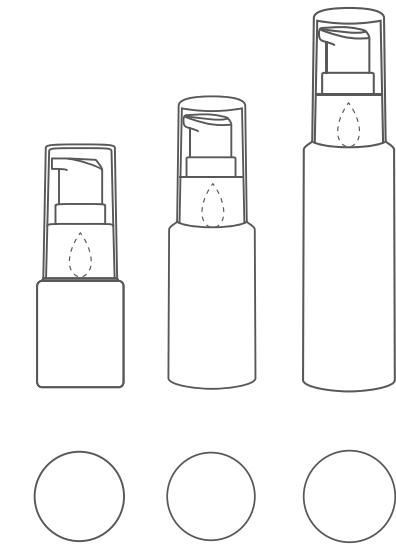

Explore a diverse selection of premium packaging possibilities with EPOPACK's extensive heavy wall range, boasting a selection of 80+ high-end bottle options. These bottles come in a variety of distinctive shapes and designs, all made to fit perfectly with our attachment offerings. They emulate the elegance of glass, yet made with environmentally conscious PET plastic. With products ranging from 15ml - 200ml, these sizes offer a spectrum of upscale packaging choices that are truly unparalleled worldwide.

HEAVY WALL JAR

EPOPACK's PET heavy wall jars key feature is the simplicity. They are a testament to years of innovation and thoughtful design all brought together in one form with sizes ranging from 10ml -100ml. Made with a mono-material concept, the jar base, cap, and lid are all made of PET or 100% PCR PET. When it comes to recycling it is important to make it as easy as possible, using a mono material option simplifies the separation process and ensures a seamless user experience from start to finish.

AIRLESS BOTTLES

With a variety of recyclable materials and attachments to choose from, EPOPACK's airless bottle lines provide many possibilities for design and formula. Sizes currently range from 7ml - 50ml to suit your needs and fit your image. We constantly strive to offer more sustainable options and now include PET airless bottles within the line. Perfect quality and the professional look created with the airless bottle system ensures that even the last drop in the bottle is reachable.

ATTACHMENT

EPOPACK offers a wide range of attachments that can be mixed and matched with their bottles to create the perfect combination for any beauty brand. They are designed to fit perfectly with EPOPACK's range of bottles, providing a secure and seamless connection. This flexible system ensures you will always have the function you need on any bottle option we offer. EPOPACK gives beauty brands the flexibility to create completed customized packaging solutions that perfectly match their product lines.

DUAL-SEAL CAP

- *Best for tricky leaage prone formulations!*
- *Simple and easy usage!*

Epopack's dual seal cap features a stopper pin located in the center of the cap that plugs into the opening of the reducer. The stopper helps provide a first layer of protection against leaage. In addition to the stopper, the cap also includes a seal ring around it. The seal ring is designed to add additional pressure to the surface of the reducer, creating a second seal to provide additional protection against leaage. This dual seal function helps to ensure that the product stays securely contained inside the bottle, even when it is being transported or stored!

Reducer + PET Screw Cap				Part	Material

Compatible with AV Series (p. 17), FD Series (p. 16), and FF Series (p. 29)

SHATTERPROOF PET DROPPER

- Safe and durable shatterproof of design!

- Simple to recycle!

Epopak's PET dropper is designed to be shatterproof, customizable, and recyclable. The collar and tube are made of PET, with 100% Post-Consumer Recycled (PCR) options available, showcasing a commitment to environmental responsibility. The shatterproof PET tube prioritizes safety and durability, and its easy customization allows for a personalized branding solution. This design achieves a balance between sustainability and practicality, reflecting a conscientious and forward-thinking approach.
